## Environmental Management

CATL is committed to the sustainable development of enterprises, and environmental management is an indispensable part of sustainable development. CATL applies the concept of sustainable development to the production activities and daily operation, and makes new achievements in environmental management. In view of product development, raw material procurement and transportation, production process, pollutant emission, resource and energy conservation and reuse, strict environmental management procedures and environmental objectives were formulated, and strict process control was implemented, basically realizing the whole process control of pollution sources.

### System certification

CATL has established ISO14001 environmental management system, Environmental management system effectively promotes the environmental management and sustainable development of CATL. Under the guidance of system standards. CATL has established the environmental management manual, the "industrial three wastes" emission control and management procedures and other system documents to reduce the emission of pollutants and environmental management risks.

### "Three wastes" management

In terms of pollutant emission, According to the requirements of relevant regulations and standards such as HJ967 "application for emission permit for issuing technical specifications for battery industry", CATL has formulated its own monitoring scheme, and entrusted qualified testing units to test the emission of waste water, waste gas pollutants and noise at the boundary of the plant, so as to ensure that the emission level of pollutants is within the control range and timely grasp the pollutant emission status. For solid waste, especially hazardous waste, "annual hazardous waste management plan" shall be prepared and submitted to

---

the competent department of ecological environment for record to ensure the reduction of hazardous waste under the premise of compliance management.

### **Environmental protection publicity**

In order to improve the staff's awareness of environmental protection, CATL regularly conducts environmental education and training for employees to prevent and reduce all kinds of environmental accidents. On the 6.5 environmental day every year, CATL actively participates in various environmental protection activities organized by the competent department of ecological environment to publicize the green and low-carbon environmental protection concept to the general public and show the company's good environmental protection image.
